

Statistiques relatives à l'enseignement médical au Canada 2018

Section I. Étude de l'AFMC sur la formation clinique postdoctorale (résidence - EMPo) – Description :

Fonds de données de l'AFMC - Cheminement des apprenants vers la pratique

L'Étude de l'AFMC sur la formation clinique postdoctorale (EMPo) fournit de l'information sur la faculté de la formation postdoctorale, la faculté de la formation prédoctorale (uniquement les diplômés des programmes de médecine canadiens), le statut juridique, l'âge, le sexe et le domaine de la formation postdoctorale. Les données qui sous-tendent l'étude sont recueillies par l'entremise du Répertoire canadien sur l'éducation post-M.D. (RCEP), qui est le répertoire central des données statistiques sur la formation médicale postdoctorale au Canada. Le RCEP tient à jour des données individuelles sur les résidents postdoctoraux et les chercheurs (fellows) fournies par les 17 facultés de médecine canadiennes. Les données sont saisies longitudinalement, du moment de l'admission à la formation, jusqu'à l'année de la sortie et jusqu'au lieu de pratique après la formation postdoctorale. Le RCEP a été créé en 1988 et constitue la source définitive de données sur la formation postdoctorale au Canada.

Section I. The AFMC Post-MD Clinical (Residency - PGY) Training Study – Contenu de la Table:

Tableau I-1	Stagiaires post-MD dans les facultés de médecine canadiennes selon la faculté de médecine offrant la formation et le rang occupé
Tableau I-2	Stagiaires post-MD dans les facultés de médecine canadiennes selon la faculté de médecine offrant la formation, le type de stagiaire et la source des fonds
Tableau I-3	Stagiaires post-MD au Canada selon la province de formation et la source des fonds pour la rémunération des stagiaires
Tableau I-4	Stagiaires post-MD dans les facultés de médecine canadiennes selon le rang du poste occupé et la source des fonds pour la rémunération des stagiaires

Tableau I-5	Stagiaires post-MD dans les facultés de médecine canadiennes selon la faculté de médecine offrant la formation et la spécialité de formation
Tableau I-6	Stagiaires post-MD dans les facultés de médecine canadiennes selon la spécialité de formation et le rang occupé
Tableau I-7	Stagiaires post-MD dans les facultés de médecine canadiennes selon la spécialité de formation
Tableau I-8i	Stagiaires post-MD au Canada selon la spécialité de formation et la situation juridique au Canada : Citoyens canadiens et résidents permanents
Tableau I-8ii	Stagiaires post-MD dans les facultés de médecine canadiennes selon la spécialité de formation et la situation juridique au Canada: Étrangers avec visas
Tableau I-9i	Stagiaires post-MD au Canada selon la spécialité de formation et la situation juridique au Canada: Toutes les facultés de médecine
Tableau I-9ii	Stagiaires post-MD au Canada selon la spécialité de formation et la situation juridique au Canada dans les facultés de médecine de langue anglaise
Tableau I-9iii	Stagiaires post-MD au Canada selon la spécialité de formation et la situation juridique au Canada dans les facultés de médecine de langue française
Tableau I-10i	Stagiaires post-MD dans les facultés de médecine canadiennes selon la spécialité de formation : Hommes
Tableau I-10ii	Stagiaires post-MD dans les facultés de médecine canadiennes selon la spécialité de formation : Femmes
Tableau I-10iii	Stagiaires post-MD dans les facultés de médecine canadiennes selon la spécialité de formation : % de femmes
Tableau I-11	Stagiaires post-MD dans les facultés de médecine canadiennes selon la faculté de médecine de formation et si, oui ou non, le diplôme MD a été décerné par une université canadienne
Tableau I-12	Stagiaires post-MD dans les facultés de médecine canadiennes selon le sexe, la langue d'enseignement de la faculté de médecine fréquentée et, si oui ou non, le diplôme MD ou un diplôme équivalent a été décerné par une université canadienne
Tableau I-13	Stagiaires post-MD dans les facultés de médecine canadiennes selon la faculté de médecine de formation, le pays d'obtention du diplôme MD et si, oui ou non, le poste occupé est en première année ou à un niveau plus élevé
Tableau I-14	Stagiaires post-MD dans les facultés de médecine canadiennes, diplômés des universités canadiennes, selon la faculté de médecine de formation post-MD et l'université qui a conféré le diplôme MD
Tableau I-15	Diplômés des facultés de médecine étrangères en formation post-MD dans les facultés de médecine canadiennes selon le pays d'obtention du diplôme MD ou son équivalent et la situation juridique au Canada
Tableau I-16	Stagiaires post-MD dans les facultés de médecine canadiennes selon l'université qui a conféré le diplôme MD ou son équivalent et année d'obtention du diplôme MD ou de son équivalent
Tableau I-17	Stagiaires en première année de formation post-MD dans les facultés de médecine canadiennes selon la faculté de médecine de formation et le type de formation
Tableau I-18	Stagiaires en première année de formation post-MD dans les facultés de médecine canadiennes selon la faculté de médecine de formation et la source d'aide salariale

Tableau I-19	Stagiaires en première année de formation post-MD dans les facultés de médecine canadiennes selon le type de position et si, oui ou non, le diplôme MD a été décerné par une université canadienne
---------------------	--

Tableau I-20	Stagiaires en première année de formation post-MD dans les facultés de médecine canadiennes selon le type de formation, le sexe et la langue d'enseignement
---------------------	---

Section I. L'Étude de l'AFMC sur la formation clinique postdoctorale (résidence - EMPo) – Notes accompagnant les tableaux

1. Les tableaux de la section I ont été renumérotés pour la publication de 2018 afin d'en faciliter la lecture. Veuillez consulter l'annexe D pour obtenir des renvois aux numéros de tableaux des publications de l'année précédente.
2. Toutes les données présentées dans ces tableaux sont celles déclarées au RCEP par les 17 facultés de médecine du Canada. Les données sont soigneusement examinées et renvoyées à la faculté de médecine pour éclaircissement en cas de problème. Toutes les données figurant dans ces tableaux se réfèrent, sauf indication contraire, au nombre de stagiaires occupant des postes au 1^{er} novembre 2017. Des données comparatives pour les années précédentes sont également incluses (pour des données antérieures, veuillez communiquer avec le Bureau de la recherche de l'AFMC). Il est important de garder à l'esprit que ces données concernent les titulaires de postes de formation, c'est-à-dire les stagiaires, et non les postes. Si certains postes pour lesquels des fonds sont disponibles n'ont pas été comblés, ils ne sont pas déclarés dans les données. Tous ces stagiaires étaient sous la supervision de l'une des 16 facultés de médecine du Canada.

Les conventions relatives au classement des résidents variaient d'une faculté de médecine à l'autre. Dans le passé, un R-1 n'est pas nécessairement une personne en première année d'un programme de formation. Dans ces tableaux, tous les stagiaires qui en sont à leur première année de formation postdoctorale sont classés dans la catégorie « formation postdoctorale année 1 »; les autres stagiaires qui, au cours des années précédentes, n'en étaient pas à leur première année de formation mais étaient classés aux fins de paiement au niveau R-1 étaient classés dans la catégorie « R-1 non nouveau ». Depuis l'élimination progressive de l'internat rotatoire, ce problème particulier de classification des stagiaires post-M.D. par grade a été résolu.

Depuis les données de 1994-1995, il y a très peu de stagiaires en médecine générale. Les stages préalables à l'obtention d'un permis d'exercice n'existent plus au Canada, car la plupart des organismes d'attribution des permis ont adopté une exigence de formation préalable à l'obtention d'un permis de deux ans. Ce n'est que dans des cas exceptionnels que les stagiaires obtiendront leur permis d'exercer autrement que par une formation en médecine familiale ou une formation spécialisée.

À partir des données de 1995-1996, la chirurgie cardio-thoracique a été retirée progressivement du programme de certification du Collège royal des médecins et chirurgiens du Canada. Elle sera éventuellement remplacée par la chirurgie cardiaque et la chirurgie thoracique, qui sont maintenant considérées comme des spécialités plutôt que comme des surspécialités.

Pour de plus amples renseignements sur la formation postdoctorale au Canada, consultez le site Web du Répertoire canadien sur l'éducation post-M.D. (RCEP) (<http://www.caper.ca>).

Dans les données relatives aux stagiaires occupant des postes au 1^{er} novembre 2017, certains domaines de formation ont été déclarés dans des domaines plus généraux.

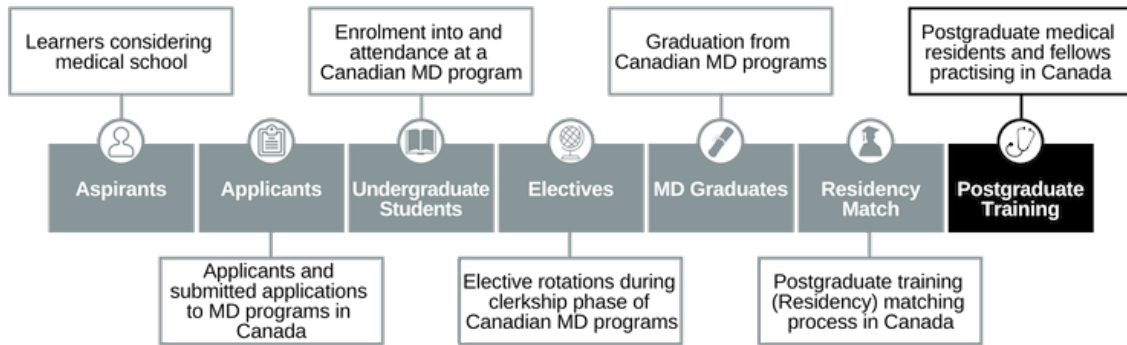

3. Domaines de formation:

- Médecine familiale : médecine familiale, médecine d'urgence (CMFC), soins aux personnes âgées (CMFC) Compétences accrues : Anesthésie (CMFC), Compétences accrues : Soins palliatifs (CMFC), Compétences accrues : Médecine du sport (CMFC), Compétences améliorées : Autre formation en médecine familiale
- Anesthésiologie : Anesthésiologie, Soins intensifs (Anes.), Médecine de la douleur (Anes.)
- Radiologie diagnostique : Radiologie diagnostique, Radiologie interventionnelle, Neuroradiologie
- Médecine d'urgence : Médecine d'urgence (Collège royal), Soins intensifs (médecine d'urgence)
- Médecine interne : Médecine interne, Médecine interne générale, Médecine du travail (Méd. int.), Médecine transfusionnelle (Méd. int.)
- Pathologie (générale) : Pathologie médico-légale (Anatomopathologie), Pathologie générale
- Soins intensifs (chirurgie) : Soins intensifs (chirurgie générale), Soins intensifs (chirurgie cardiaque)
- Autres surspécialités pédiatriques : SOMME totale (Péd.) dans les données du RCEP Tableau 4, Radiologie pédiatrique, Médecine d'urgence pédiatrique, Neurologie (Pédiatrie)
- Chirurgie générale : Chirurgie générale, Chirurgie colorectale, Oncologie chirurgicale générale
- Psychiatrie : Psychiatrie, Psychiatrie de l'enfant et de l'adolescent, Psychiatrie légale, Psychiatrie gériatrique.

Canadian Medical Education Statistics 2018

Section I – The AFMC Post-MD Clinical (Residency - PGY) Training Study – Description:

AFMC Data Holdings - Learners Pathway to Practice

The AFMC Post-MD Clinical (PGY) Training Study provides information on faculty of post graduate training, Faculty MD of MD (Graduates of Canadian MD programs only), legal status, age, gender, and field of post-MD training. The data informing the study are collected via the Canadian Post-M.D. Education Registry (CAPER), which is the central repository for statistical information on postgraduate medical education in Canada. CAPER maintains individual-level data on postgraduate medical residents and fellows provided by the seventeen Canadian faculties of medicine. Data are captured longitudinally, from the time of entry to training, to the year of exit and to practice location following post-M.D. training. CAPER was established in 1988 and is the definitive source of data on Post-MD training in Canada.

Section I. The AFMC Post-MD Clinical (Residency - PGY) Training Study – Table Contents:

Table I-1	Post-MD Trainees in Canadian Faculties of Medicine by Faculty of Medicine Providing Training and Rank
Table I-2	Post-MD Trainees in Canadian Faculties of Medicine by Faculty of Medicine Providing Training, Type of Trainee and Source of Support
Table I-3	Post-MD Trainees in Canada by Province of Training and Source of Salary Support for Trainees
Table I-4	Post-MD Trainees in Canadian Faculties of Medicine by Rank of Trainee and Source of Salary Support
Table I-5	Post-MD Trainees in Canadian Faculties of Medicine by Faculty of Medicine Providing Training and Field of Training
Table I-6	Post-MD Trainees in Canadian Faculties of Medicine by Field of Training and Rank
Table I-7	Post-MD Trainees in Canadian Faculties of Medicine by Field of Training
Table I-8i	Post-MD Trainees in Canada by Field of Training and Legal Status in Canada: Canadian Citizens and Permanent Residents

Table I-8ii	Post-MD Trainees in Canada by Field of Training and Legal Status in Canada: Visa Trainees
Table I-9i	Post-MD Trainees in Canada by Field of Training and Legal Status in Canada: All Faculties of Medicine
Table I-9ii	Post-MD Trainees in Canada by Field of Training and Legal Status in Canada in English Language Faculties of Medicine
Table I-9iii	Post-MD Trainees in Canada by Field of Training and Legal Status in Canada in French Language Faculties of Medicine
Table I-10i	Post-MD Trainees in Canadian Faculties of Medicine by Field of Training: Men
Table I-10ii	Post-MD Trainees in Canadian Faculties of Medicine by Field of Training: Women
Table I-10iii	Post-MD Trainees in Canadian Faculties of Medicine by Field of Training: % Women
Table I-11	Post-MD Trainees in Canadian Faculties of Medicine by Faculty of Medicine Providing Training and Whether or Not MD Degree Earned in Canada
Table I-12	Post-MD Trainees in Canadian Faculties of Medicine by Sex, Language of Instruction of Faculty of Medicine Providing Training and Whether or Not MD or Equivalent Degree Earned in Canada
Table I-13	Post-MD Trainees in Canadian Faculties of Medicine by Faculty of Medicine Providing Training, Country in which MD Earned and Whether or Not Position at Year 1 Post-MD or Higher Level
Table I-14	Post-MD Trainees in Canadian Faculties of Medicine who Graduated from Canadian Universities by Faculty of Medicine Providing Post-MD Training and University Awarding MD Degree
Table I-15	Graduates of Foreign Medical Schools in Post-MD Training in Canadian Faculties of Medicine by Country in which MD or Equivalent Degree Earned and Legal Status in Canada
Table I-16	Post-MD Trainees in Canadian Faculties of Medicine by University Awarding MD or Equivalent Degree and Year in which MD or Equivalent Degree Earned
Table I-17	Post-MD Year 1 Trainees in Canadian Faculties of Medicine by Faculty of Medicine Providing Training and Type of Training
Table I-18	Post-MD Year 1 Trainees in Canadian Faculties of Medicine by Faculty of Medicine Providing Training and Source of Salary Support
Table I-19	Post-MD Year 1 Trainees in Canadian Faculties of Medicine by Type of Position and whether or not MD Degree Earned in Canada
Table I-20	Post-MD Year 1 Trainees in Canadian Faculties of Medicine by Type of Training, Sex and Language of Instruction

Section I. The AFMC Post-MD Clinical (Residency - PGY) Training Study – Table Notes:

1. Tables in Section I have been renumbered for 2018's publication for better readability. Please see Appendix D for a cross reference of table numbers across years.

2. All data in these tables are as reported to CAPER by the seventeen faculties of medicine of Canada. The data are carefully scrutinized and referred back to the faculty of medicine for clarification when problem situations appear to exist.

All data reported in these tables, unless otherwise indicated, refer to the number of trainees occupying posts on 1 November 2017. Comparative data for previous years are also included (for earlier data, please contact the Office of Research, AFMC). It is important to bear in mind that these data refer to incumbents of training positions, i.e. trainees, and not to positions. If some positions for which funds are available were unfilled, they are not reported in the data. All these trainees were under the supervision of one of the sixteen medical schools in Canada. Conventions as to how residents are ranked have varied from one faculty of medicine to another. In the past a PGY-1 is not necessarily an individual in the first year of a training program. In these tables, all trainees who are in their first year of post-MD training are classified as "Post-MD year 1"; other trainees who in earlier years were not in their first year of training but were ranked for payment purposes at the PGY-1 level were classified as "PGY-1 not new". Since the phasing out of the rotating internship, this particular classification problem of post-MD trainees by rank has been resolved.

Beginning with the 1994/95 data, there are very few trainees in general medicine. Pre-licensure internships no longer exist in Canada as most licensing authorities have moved to a two year pre-licensure training requirement. Only in exceptional cases will trainees proceed to licensure other than through family medicine or specialty training.

Beginning with the 1995/96 data, cardio-thoracic surgery was phased out of the Royal College of Physicians and Surgeons of Canada certification program. It will eventually be replaced with cardiac surgery and thoracic surgery, which are now considered specialties rather than sub-specialties.

For additional information regarding post-MD training in Canada, see the Canadian Post-M.D. Education Registry (CAPER) website (<http://www.caper.ca>).

In the data for trainees in positions on 1 November 2017, some fields of training have been reported under more general fields.

3. Fields of Training:

- Family Medicine: Family Medicine, Emergency Medicine (CFPC), Care of the Elderly (CFPC) Enhanced Skills: Anesthesia (CFPC), Enhanced Skills: Palliative Care (CFPC), Enhanced Skills: Sports Medicine (CFPC), Enhanced Skills: Other Fam. Med. Training
- Anesthesiology: Anesthesiology, Critical Care (Anes.), Pain Medicine (Anes.)
- Diagnostic Radiology: Diagnostic Radiology, Interventional Radiology, Neuroradiology
- Emergency Medicine: Emergency Medicine (Royal College), Critical Care (Emergency Med.)
- Internal Medicine: Internal Medicine, General Internal Medicine, Occupational Medicine (Int. Med.), Transfusion Medicine (Int. Med.)
- Pathology (general): Forensic Pathology (Anat. Path.), General Pathology
- Critical Care (surgery) : Critical Care (General Surgery) , Critical Care (Cardiac Surg.)
- Other Ped. Subspecialties : SUM all (Ped) in the caper data Caper table4 , Pediatric Radiology , Pediatric Emergency Medicine , Neurology (Pediatrics)
- General Surgery: General Surgery, Colorectal Surgery, General Surgical Oncology
- Psychiatry : Psychiatry, Child and Adolescent Psychiatry, Forensic Psychiatry, Geriatric Psychiatry
